## **DETAILED ACTION**

### ***Specification***

The disclosure is objected to because of the following informalities, appropriate correction is required:

The specification refers, at page 13 line 33, to a diagram. However, there are no diagrams or figures of record in the application. Additionally, the specification does not contain an acceptable abstract (MPEP 608.01(b)), but rather simply a copy of the front page of the corresponding PCT application. The examiner respectfully reminds applicant that a copy of the PCT front page is not an acceptable abstract.

### ***Claim Objections***

Claims 1 and 11 are objected to because of the following informalities: in order to remove any ambiguity in the interpretation of the diagram of formula II (i.e. that formula II consists of a core of 3 carbon atoms), the bottom and right-hand lines should be perceptibly shorter than those to substituents R<sub>5</sub> and OH. Appropriate correction is required.

Claims 12 and 13 are objected to because of the following informalities: subscripts are used inconsistently. Appropriate correction is required.

Claim 14 is objected to because of the following informalities: the claim text does not end with a period. MPEP 608.01(m). Appropriate correction is required.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The phrase "for example" (in the definition of R) renders the claim indefinite because it is unclear whether the limitation(s) following the phrase are part of the claimed invention. See MPEP § 2173.05(d). The examiner respectfully suggests deleting the phrase.

Claim 11 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The definition of formula III is unclear. The claim recites a list of substituents, but not how they are configured to yield a compound defined by a formula III. The examiner respectfully suggests that a diagram of formula III be included in the claim.

Claims 16 and 17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claims 16 and 17 recite the limitation "formula I" . When claims 16 and 17 depend from claims 11-14, there is insufficient antecedent basis for this limitation in the claims, since claims 11-14 refer to a formula III.

The remaining claims are also rejected under 35 USC 112, second paragraph, as claims which depend from indefinite claims are also indefinite. *Ex parte Cordova*, 10 USPQ 2d 1949, 1952 (PTO Bd. App. 1989).

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-15 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by WO 94/26704 whose CAPLUS abstract is relied upon for purposes of this Office Action. The reference teaches applicant's compounds and compositions. For instance, the compound: RN=161189-93-1.

### ***Allowable Subject Matter***

The subject matter of claims 16-18 would be allowable if the claims were rewritten as independent claims which also addressed the pertinent objections and 112 rejections outlined in this Office Action.
